

Amendments to the Specification:

Please replace the paragraph beginning at page 2, line 17, with the following rewritten paragraph:

-- The European Patent Application EP 1069406 and German Patent DE 19738764 disclose a system for guiding a driver comprising the display of graphical information representative of topographical characteristics ahead ~~forehead~~ of the driver. For example, a graphical curve section indicates direction and radius of curvature of an upcoming curve in the road. The type of guiding information aims to support a safe drive. The displayed images are representative of objects and/or topographical characteristics ahead ~~forehead~~ of the driver and may change display position, form, or color in dependence of vehicle position and speed of vehicle.--
